Sir:

Please amend the above-identified patent application
as follows:

In the claims:

Please amend claim 1 as shown on the following
pages:

1. (Currently amended) A method of decreasing CD63 facilitated human immunodeficiency virus entry into macrophage cells susceptible to infection with a strain of HIV, the method comprising identifying a subject having macrophage cells susceptible to infection with a strain of HIV and exposing the cells to an anti-CD63 antibody in an amount effective to bind the anti-CD63 antibody to CD63 present in the cells, whereby the CD63 facilitated human immunodeficiency virus entry into the cells is decreased.
